EDUCATION (2022-ongoing)

B.Tech Information Technology, Thiagarajar College of Engineering - 8.5 CGPA (*Upto 5th semester)

SKILLS

- **Web Development:** MERN, Bootstrap
- **Backend:** SQL, MongoDB, REST APIs
- **Programming Languages:** Java (Object-Oriented Programming)
- **Tools:** GitHub, Postman, Figma
- **APIs:** Gemini API, YouTube API, Spotify API

SUMMARY

I'm a B.Tech IT student at Thiagarajar College of Engineering with a passion for full-stack development, APIs, and solving real-world problems through code. I love building scalable web apps with Node.js, MongoDB, and SQL, and I'm always eager to explore new technologies. Excited to learn, collaborate, and contribute to impactful open-source projects through GSSoC.

ACHIEVEMENTS

Winner - Wonders of AI Hackathon conducted by **KARE open source society**

- Built a live emotion-based music recommendation system using MobileNetV2, OpenCV, and Spotify API

Winner of the "Hackathon for Smart Student Hostels" conducted by IIT, Madras

- Won the round 1 amongst 300 teams for the ideation of Alignmate

Winner - Code Relay | Code Feast Round I, Round II

- Solved problems in short coding and complex coding round within a given time

Winner - Best Designer of the Year - FIGMA

- Developed a UI prototype for party hall management app
- Won among 30 teams within college

Best project display at SIG day at TCE

- Won among 35 teams from overall IT department

PROJECTS

Co-Buddy | *MERN Stack, Gemini API*

- Developed a quiz generator that dynamically creates quizzes based on user-provided topics, leveraging the **Gemini API** for content generation.
- Implemented a robust backend using **Node.js** and **Express**, with a **MongoDB** database and implemented **RESTful APIs** for storing user profiles, quiz scores, and user activity logs.
- Built an intuitive front-end with **React** for seamless user interaction, ensuring a responsive and engaging experience.
- **Checkout @Github Repo**

Mock Interviewer | *ReactJS, Flask, Gemini API*

- Developed an AI-powered web application to assist with interview preparation by generating **resume-specific** questions.
- Utilized **Gemini API** for intelligent question generation and answer evaluation.
- Trained a **transfer learning model** for voice confidence detection using the **TESS dataset**, achieving **97% accuracy**.
- Integrated **speech-to-text** functionality using Python's **speech_recognition** library for seamless voice input support.
- **Checkout @ Github Repo**

Spotify-clone | *ReactJS, Spotify-web-API, Context API and reducer*

- Integrated **Oauth** for user authentication
- Used **spotify web api** to fetch user's playlists and control playback.
- Used React Context API for centralized state management.
- Generated dynamic UI themes using ColorThief.
